

NOTICE

FIRE HYDRANT REPLACEMENT & INSTALLATION PROJECT

JANUARY 20, 2025

The City of LaFayette is pleased to announce an upcoming project to enhance public safety and improve its water distribution system through the installation of new fire hydrants throughout town. Work is scheduled to begin on Monday January 20, 2025, and will continue through April 20, 2025. During this time, residents and businesses may experience disturbances to the water system, including:

- Temporary water outages
- Reduced water pressure
- Discoloration of water

Discolored water is not an unusual side effect of opening fire hydrants, nor does it indicate any type of problem in the water system. .

Residents are advised not to wash light-colored clothes if their water is stained or discolored.

The City will make every effort to minimize these disruptions and ensure timely completion of the project. If you experience prolonged issues with your water service, please contact the LaFayette Water Department Superintendent Kevin Page at 334-276-9492 or via email kpage@cityoflafayetteal.com or contact Asst. Superintendent Micheal Turner at 334-234-1148.

We appreciate your patience and understanding as we undertake this important project to enhance the safety and reliability of our community's water infrastructure. Thank you for your cooperation.
